MOANA BEACH SHADE

CHECK LIST

- 1 x Shade (bag attached)
- 2 x spreader poles with holes near end caps
- 2 x upright pole bases
- 2 x upright poles tops with spigots
- 4 x 2.5m ropes with plastic sliders
- 4 x sand pegs

Sar Major has been manufacturing the Moana Beach Shade for over 60 years. The shades are made in our St Marys factory in South Australia from cool breathable cotton, this simple shade includes handy features such as snap together poles and easy rope sliders. Plus the carry bag is attached to the shade so it won't blow away and you can zip it up to store your keys & sun cream.

TO SET UP THE MOANA BEACH SHADE

When you first use your Moana Beach Shade, the ropes and sliders will need to be tied to the eyelets on the front corners of the beach shade. Once this has been done you may leave them in place for future use.

1. Unroll the beach shade and lay flat (plastic eyelet reinforcing faced down).
2. Peg down the rear (where the bag is sewn on) of the shade.
3. Join the two poles with the holes near the end caps to form the horizontal spreader bar.
4. The four remaining poles will make the two sets of upright poles with spigots.
5. The spigots of the two upright poles slot through the holes in the spreader and then into the second set of eyelets closest to the front of the beach shade. ***Tip*** Make sure that you have the front pegs ready in your hand and hold onto the ropes at the front of the shade to keep the shade upright while you complete the next step.
6. Peg the front guy ropes down and use the black guy rope sliders to tighten.

ALTERNATE SET UP

If your model has a second set of ropes you can use them in the rear of the shade. You can then place the poles in the second set of eyelets closest to the rear of the shade. This will leave the opening at the rear of the shade and make the shade lower at the front.

DELUXE MOANA BEACH SHADE

CHECK LIST

- 1 x Deluxe Shade (bag attached)
- 4 x spreader poles with holes near end caps
- 4 x upright pole bases
- 4 x upright poles tops with spigots
- 4 x 2.5m ropes with plastic sliders
- 8 x sand pegs and 8 x tent pegs (for use on grass)

TO SET UP THE DELUXE MOANA BEACH SHADE

Set up of The Sar Major Deluxe Moana Beach Shade is similar to the previous steps plus there are an extra set of poles, which go in the extra eyelets provided. The second set of ropes & pegs can be used on one of the upright poles to assist with the sturdiness of the unit. The walls on the Deluxe Moana Beach Shade can be rolled up or tied down using the ties sewn into the unit.

TO PACK UP - ALL MODELS

1. Remove the poles and pull them apart. Remove the pegs from the front and rear of the beach shade.
2. Fold the beach shade until the width is a bit narrower than the bag.
3. Fold the beach shade in halves towards the bag, tucking in any ropes as you fold it.
4. Put the poles and pegs on the beach shade and roll it towards the bag.
5. Tuck everything into the bag and close the zip.

CARE INSTRUCTIONS

Ensure the shade is completely dry when stored to prevent mould and mildew.

If pushing the poles into the sand always support the bottom of the part of the pole and don't push down from the top to avoid buckling.

If high gusty winds occur it is recommended that you dismantle your beach shade.

If the button on the poles gets pushed in, simply tap the pole upside down on a hard surface and use a pen, small screwdriver or paperclip to flick the button back into place.

For the safety of others, make sure that you remove all pegs from the sand when you pack up.

To ensure the best use of your beach shade, avoid misuse, abuse, negligence, incorrect assembly, modifications, improper and irregular maintenance.

Beach shades are not a replacement for sun safety. Ensure you Slip, Slop, Slap and Wrap when out in the sun and have a great time!

**We hope you enjoy your
Sar Major Moana Beach Shade!**
